Backend: Node.js, Express.js, Java, Spring Boot, Hibernate, Microservices, REST APIs, WebSocket
Databases: MongoDB, PostgreSQL, MySQL, SQL
CMS & eCommerce: Payload CMS, Shopify, WordPress, Storyblok
Security: Authentication, Google OAuth, Two-Factor Authentication (2FA)
Tools & Testing: Git, GitHub, npm, pnpm, Docker, Vitest, Playwright, IntelliJ IDEA, Eclipse, VS Code, PyCharm
Other: Debugging, Performance Optimization, Manual Testing, Quality Assurance, Python, Gemini API, C/C++, Mobile App Development, Tuya

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Eleva8e Digital (formerly Digilink Ads) 02/2024 – Present
New Delhi, India

- Develop and maintain responsive web applications and corporate websites for enterprise clients using React, Node.js, Express.js and MongoDB.
- Improved website speed by 30% through code optimization and performance tuning.
- Implemented 10 new features in React projects, improving UX scores by 15%.
- Performed 15+ quality checks on releases, reducing production bugs by 40%.
- Mentored 5 junior developers, improving team productivity by 20%.
- Integrated new features, plugins and third-party tools; ensured cross-browser compatibility and a consistent user experience.

Java Developer Intern — Ravionics 05/2023 – 07/2023
Remote

- Developed a Java application from scratch using Spring Boot.
- Provided technical solutions and support to the operations team.

SELECTED CLIENT PROJECTS (ELEVA8E DIGITAL)

Aster Hospitals — Healthcare Website | asterhospitals.in

- Contributed to the website for Aster Hospitals, a multi-specialty healthcare network of 19 hospitals across 5 Indian states, covering hospital, specialty and doctor-discovery sections and appointment-booking journeys.

Agedefy (Ahlmax) — eCommerce Platform, MERN | uat3.devdevelopment.co.in

- Built a scalable eCommerce platform for a premium skincare brand covering product management, customer engagement and order handling.

Euler Motors — Corporate Website, MERN | https://www.eulermotors.com/en/

- Built a modern, performance-driven website for a commercial EV manufacturer showcasing its vehicle lineup, dealership network and services.

Waaree — Corporate Website | waaree.com

- Built a responsive, performance-optimized corporate website for a leading solar energy company with easy content management.

Updapt — SaaS Platform / Corporate Website | updapt.com

- Worked on front-end UI updates, cross-browser compatibility and performance optimization for an ESG SaaS platform.

RHI Magnesita — Corporate Website | rhimagnesita.com

- Developed front-end enhancements for the global corporate website of a leading refractory products company.

Pertsol — Corporate Website | pertsol.com

- Built responsive front-end updates and content sections for a telecom compliance and lawful-interception solutions provider.

Archies International — Smart Lock Mobile App, Tuya

- Built a mobile app for Archies International's smart locks using the Tuya platform.

PERSONAL PROJECTS

RedirectKit — Node.js, TypeScript, Next.js, pnpm, npm
npm Package | GitHub Repository

- Developed and published RedirectKit, an npm package that simplifies redirect management in Next.js applications through organized, JSON-based configuration.
- Implemented redirect validation, duplicate rule detection, and redirect loop and chain analysis to catch configuration issues before deployment.
- Designed developer-friendly CLI commands for redirect inspection, validation, and CSV-based import/export workflows.
- Integrated with Next.js configuration to centralize redirect rules while preserving existing application settings.
- Focused on maintainability, TypeScript support, automated testing, and developer experience.

ArtXofy — Artist Marketplace & eCommerce Platform

- Built an eCommerce platform for artists where any artist can register and list their artwork for sale.
- Enabled artists to host Baithaks (live art and cultural sessions) and customers to book consultations with artists directly through the platform.

AI Blog Studio — Next.js, Payload CMS, PostgreSQL, TypeScript | github.com/N1810/ai-blog-studio

- Built an AI-powered blog publishing platform on Next.js and Payload CMS with a PostgreSQL database, Tailwind CSS, and a Docker-based setup.
- Added automated testing with Vitest and Playwright, plus database backup and verification scripts.

Personal AI Voice Assistant — Python, PyQt6, Gemini Live API | github.com/N1810/Ai-Assistence

- Customized and extended an open-source real-time voice assistant (Gemini Live API) into a personalized, cross-platform desktop assistant with a PyQt6 interface.
- Features voice control of the computer, screen and webcam vision, persistent memory, a plugin system, and a wake-word trigger.

Auth App — MERN | github.com/N1810/AuthApp

- Built a secure login and registration system with Google authentication and custom two-factor authentication (2FA).

Spring Boot WebSocket Chat App — Java, Spring Boot | github.com/N1810/SpringBoot-WebSocket-Chat-App

- Built a real-time chat application with Spring Boot and WebSocket supporting join, chat, and leave in chat rooms.

Employee Management System — Java | github.com/N1810/Employee-Management-System

- Implemented CRUD operations to add, update, delete, and retrieve employee records.

Sukalp Foundation Website — HTML, CSS, JavaScript | sukalp.org

- Built the website for a registered non-profit focused on education, health, environment, and skill development.
